Double Patenting

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

1. Claim 21-30 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 3, 13, 17, 21, 25 of U.S. Patent No. 6,519,413. Although the conflicting claims are not identical, they are not patentably distinct from each other because.

Regarding application claims 21-25, respectively recite all as recited in patented claims 3, 13, 17, 21, 25 respectively, but, the patented claims have a different scope in view of at least one variation of recited limitations such as: the patented

claims further recite "a user defined program chain (PGC), therefore are deemed narrower than the application claims.

Further regarding claims 26-30, claim 26 is substantially the same as claim 21 and is rejected for the same reasons as claim 21 against patented claim 3 {medium claim}.

Regarding claims 27-30, the medium claim 3 fails to recite, recording and reproduction means to record and reproduce from the medium, associated with a reproducing units.

The examiner takes official notice with respect claims 27-30, that recording and reproducing to and from the medium and the means of heads to facilitate, the recording to the data structures and reproduction of the data structure is obvious to those skilled in the art, therefore, it would have been obvious to further recite, in view of the medium, to record and reproduce the recited data structure to and from the medium, as is obvious to those skilled in the art.

Allowance of claims 21-30 of the instant application would result in a time-wise extension of the monopoly previously granted for the invention defined by patent claim(s), therefore, obviousness type double patenting is deemed proper.
